There will be one written paper of **three** hours duration carrying 100 marks and Internal Assessment of 100 marks.

The paper will be divided into two sections, **Section I** and **Section II**

**Section I** will consist of a number of questions covering Section A of the syllabus. The candidates are to attempt **three** questions out of **five**.

**Section II** will consist of questions covering Section B of the syllabus. The candidates are to attempt **two** questions out of **three**.

**THEORY – 100 Marks**

**SECTION A**

1. **Geometrical Constructions based on Plane Geometry**

   (i) Division of a line into equal parts: Construction of a triangle when its perimeter and the ratio of the lengths of its sides are given.

   (ii) Division of a circle into equal parts (4, 6, 8, 12) using set square or compasses.

   (iii) To find the length of an arc/circumference of a circle.

   (iv) An angle and a circle touching its sides.

   (v) A circle of given radius passing through two given points.

   (vi) An arc passing through three non-collinear points.

   (vii) A continuous arc passing through not more than 5 non-collinear points.

   (viii) A regular polygon (3, 4, 5, 6 sides) with special methods (side given).

   (ix) Construction of a regular octagon in a square (side of the square = distance between parallel sides of a octagon).

   (x) More than one polygon (sides 3, 4, 5, 6, 7, 8) on a common base on the same side/opposite sides.

   (xi) Inscribing/Circumscribing a circle on a regular polygon (3, 4, 5, 6 sides).

   (xii) Inscribe/Circumscribe a circle of given radius by a regular polygon up to six sides.

   (xiii) In a regular polygon to draw the same number of equal circles as the sides of the polygon each circle touching one/two sides of the polygon and two of the other circles externally.

   (xiv) Outside a regular polygon to draw the same number of equal circles as the sides of the polygon each touching one side of the polygon and two of the other circles externally.

   (xv) Regular hexagon and 3 equal circles inside it touching one side/two sides of the hexagon and the other two circles externally.

   (xvi) A circle and (3, 4, 5, 6,) equal circles inside it touching internally and touching each other externally.

   (xvii) Tangents to a circle at a point on the circumference.

   (xviii) Direct common tangents/Transverse common tangents to two equal/unequal circles. Also, to measure and record their lengths.

   (xix) Drawing (not more than three) circles touching each other externally and also touching two converging lines (radius of one of the circles is given).

2. **Area constructions**

   (i) Constructions based on the application of area theorems (area of polygons).

   (ii) Converting the given polygon into a triangle having equal/half/double the area of the polygon.

   (iii) Changing given triangles (2 or 3) into a single triangle having the area equal to the sum of the areas of the given triangles.

   **Methods for constructing:**

   - a scalene triangle / isosceles triangle / a right angled triangle equal to the area / half the area / twice the area of any given quadrilateral.
• a parallelogram equal in area to any given triangle.
• a triangle equal in area to the sum of any two/three given triangles.
• a triangle equal in area/half the area to any given regular pentagon/hexagon.
• a triangle of a given base/altitude, equal in area to another given triangle.
• a triangle equal in area to ½ or twice the area of any given triangle.
• a square equal in area to any given parallelogram/triangle/rectangle.
• a square, equal in area to any given regular pentagon/hexagon.

3. **Templates as an application** of geometrical constructions and other constructions such as:
   (i) Arc of a given radius touching a given line and passing through a given point.
   (ii) Arc of given radius touching two intersecting straight lines.
   (iii) Arc of given radius touching a given arc and a straight line.
   (iv) Arc of a given radius touching two given arcs (externally/internally).
   (To redraw the given figure and insert the dimensions).

   Applying the construction methods, involving circles, tangential, circles/arcs/straight lines and points, for constructing **TEMPLATES** of various shapes.

4. **Scales**
   (i) To find the R.F. (Representative Fraction) and the scale length from the given data by showing neat working.
   (ii) Construction of a plain scale/diagonal scale.
   (iii) Use of constructed scale in the preparation of field drawing scale diagram (Enough data to be provided).

   Definition of R.F. formula. Finding the Representative Fraction (R.F.) and the Scale length by the given data by showing neat working/lettering. Construction of Plain and Diagonal Scales in different units of linear measurements, and marked and numbered accordingly. Transferring the required measurements, from the constructed scale, to create finished Scaled drawings of: field drawings/templates/Orthographic projections/plane geometrical constructions.

5. **Engineering Curves**
   An ellipse, a parabola

   Engineering Curves (construction only) as used in manhole covers, arches, dams, monuments etc.
   (i) **Ellipse** (major and minor axes given)
       (a) by arcs of circles method.
       (b) by the concentric circles method.
       (c) by oblong method.
   (ii) **Parabola** (base and axis given)
       (a) by rectangle method.
       (b) by tangent method

6. **Solids**
   (i) Orthographic projections of right solids such as regular prisms and pyramids with bases as regular polygons up to six sides, cylinder and cone.
       (a) Axis perpendicular to one of the reference planes and parallel to the other.
       (b) Axis inclined to one of the reference planes and parallel to the other (only auxiliary views to be asked). Use of auxiliary plane may be included (Auxiliary elevation and auxiliary plan).
   (ii) Development of surfaces of the right solids (Parallel and Radial).
   (iii) Determination of true length of line when inclined to both the reference planes e.g. slant edge of a pyramid.

   **Right Solids**, such as, **Prisms** (triangular, square, pentagonal and hexagonal)

   **Pyramids** (triangular, square, pentagonal and hexagonal bases.), Cylinders and Cones
**Simple word problems on:**

(i) **Orthographic projections of right solids.**
   - with its axis, perpendicular to one plane, and, parallel to the other plane.
   - with its axis, parallel to one plane, and, inclined to the other plane

Only Auxiliary views to be asked.

(ii) **Parallel and Radial Development of lateral surfaces of right solids with axis perpendicular to H.P. and parallel to V.P.**

(iii) **Determination of true length of the slant edge of a pyramid when the slant edge is inclined to both H.P. and V.P.**

(iv) **Auxiliary views:**
   - Figure showing auxiliary inclined plane should be given with the word problem.
   - Auxiliary elevation of right solid with axis parallel to H.P. and inclined to V.P.
   - Auxiliary plan of a right solid with axis inclined to H.P. and parallel to V.P.

7. **Oblique drawing**
   Conversion of given orthographic views to oblique view (circular parts in top view to be excluded). Circular parts only in one view either in front view or in the side view. The angle of inclination with the receding axis to be given

8. **Sections of right solids (prism, pyramid, cylinder and cone)**

(i) Sectional views of cut solids with axis perpendicular to H.P. and parallel to V.P.
   - V.T. (Vertical Trace) parallel to or inclined to H.P.
   - H.T. (Horizontal Trace) parallel/inclined to V.P. (Figure showing V.T and H.T should be given) Questions based on word problems should be excluded.

(iii) True shape of a section.

**Sections of Right Solids, such as, Prisms, Cylinders, Pyramids and Cones.**

Sectional views, of cut / truncated solids
   - with its axis, perpendicular to the H.P. and parallel to the V.P., when the cutting plane is parallel / inclined to H.P. or, to the V.P. (only one cutting plane to be expressed in the figure)

**Developments of the lateral surfaces of:**
   - Cut Solids / Truncated Solids (parallel and radial), such as, Prisms, Cylinders, Pyramids and Cones with one cutting plane shown in the figure.
   - The True Shape of the, cut / truncated, surface of right solids such as prism / pyramid / cylinder / cone when axis is perpendicular to H.P. and parallel to V.P.

9. **Isometric Drawing** (Use of scale to draw isometric drawing may be included. e.g. 2:1 or 1:2 only).

   (a) Copy the given isometric figure.
   (b) Conversion of the given orthographic view into isometric drawing.

**Isometric Drawing: In full scale and maybe in the scale of 2:1 or 1:2:**
   - Drawing the Isometric view, from a given, Isometric view.
   - Drawing the Isometric view, by reading and visualizing the same, from the given Orthographic views.

10. **Sectional Orthographic views (1st and 3rd angle methods)**

   (a) Conversion of given pictorial view (Isometric/oblique into full sectional orthographic view).
   (b) Conversion of a given orthographic view into full sectional view.

**The Orthographic Projection, First and third, angle methods: (at least one of the views as sectional view).**
   - Drawing the Orthographic views / full
sectional views of an object shown in a given pictorial view. Isometric / Oblique with cutting plane / planes shown.

- Converting the given Orthographic view / views into Sectional views, full according to the Cutting plane line / lines marked in a given view / views.
- Dimensioning the Orthographic views showing the cutting plane, naming the views.

**PART II- INTERNAL ASSESSMENT**
- **100 MARKS**

1. To prepare a file containing minimum 15 drawing assignments. The drawing assignments should cover entire syllabus of class X. One / two assignments on each units of syllabus should be prepared on half imperial size drawing paper.

2. To make a three-dimensional model with stiff cartridge paper / chart paper involving the application of the development of solids such as a prism / pyramid.

**EVALUATION**

The assignments/project work is to be evaluated by the subject teacher and by an External Examiner. The External Examiner may be a teacher nominated by the Head of the school, who could be from the faculty, but not teaching the subject in the section/class.

The Internal Examiner and the External Examiner will assess the assignments independently.

**Award of marks (100 marks)**

- Subject Teacher (Internal Examiner): 50 marks
- External Examiner: 50 marks

The total marks obtained out of 100 are to be sent to the Council by the Head of the school.

The Head of the school will be responsible for the online entry of marks on the Council’s CAREERS portal by the due date.
### INTERNAL ASSESSMENT IN TECHNICAL DRAWING APPLICATIONS - GUIDELINES FOR MARKING WITH GRADES

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Preparation</th>
<th>Analysis</th>
<th>Process</th>
<th>Results</th>
<th>Presentation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grade I</td>
<td>Follows instructions (written, oral, and diagrammatic) with understanding;</td>
<td>Analyses problem systematically. Recognises a number of variables and</td>
<td>Comments upon, recognises use of instruments, degree of accuracy.</td>
<td>Recognises and comments upon sources of error. Can deal with unexpected</td>
<td>Presentation is accurate and good. Appropriate</td>
</tr>
<tr>
<td>(4 marks)</td>
<td>modifies if needed. Familiarity with and safe use of apparatus, materials,</td>
<td>attempts to control them to build a logical plan of construction.</td>
<td>Process is systematic.</td>
<td>effects, suggesting modifications.</td>
<td>techniques are well used.</td>
</tr>
<tr>
<td></td>
<td>techniques.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grade II</td>
<td>Follows instructions to perform experiment with step-by-step operations.</td>
<td>Specifies sequence of operation; gives reasons for any change in</td>
<td>Makes relevant procedural modification. No assistance is needed for</td>
<td>Draws qualitative conclusions to proceed with</td>
<td>Presentation is adequate. Appropriate techniques are used.</td>
</tr>
<tr>
<td>(3 marks)</td>
<td>Awareness of safety. Familiarity with apparatus, materials and techniques.</td>
<td>procedure.</td>
<td>understanding steps of constructions.</td>
<td>construction.</td>
<td></td>
</tr>
<tr>
<td>Grade III</td>
<td>Follows instructions to perform a single operation at a time. Safety</td>
<td>Develops simple development strategy. Trial and error modifications made</td>
<td>Detailed instructions not given.</td>
<td>draws obvious qualitative conclusions as required in the process.</td>
<td>Presentation is okay, but disorganised in some places. Overwriting; rough work is untidy.</td>
</tr>
<tr>
<td>(2 marks)</td>
<td>awareness. Familiarity with apparatus &amp; materials.</td>
<td>to proceed with the construction.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grade IV</td>
<td>Follows some instructions to perform a single practical operation. Casual</td>
<td>Struggles through the construction. Follows very simple techniques.</td>
<td>Tends to make mistakes in the following procedure.</td>
<td>Even when detailed format is provided, struggles or makes errors while processing the work.</td>
<td>Presentation is poor, disorganised but follows an acceptable sequence. Rough work missing or untidy.</td>
</tr>
<tr>
<td>(1 mark)</td>
<td>about Safety. Manages to use apparatus &amp; materials.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grade V</td>
<td>Not able to follow instructions or proceed with practical work without</td>
<td>Cannot proceed with the development without help from time to time.</td>
<td>Even when format is given procedure is not understood.</td>
<td>Cannot process the work even with considerable help.</td>
<td>Presentation unacceptable; disorganised, untidy, poor. Rough work missing.</td>
</tr>
<tr>
<td>(0 marks)</td>
<td>full assistance. Unaware of safety.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
