Online Training on “Digital Pedagogy”

National Education Policy 2020 emphasizes the use and integration of technology to improve multiple aspects of education. The Digital India Campaign is helping to transform the entire nation into a digitally empowered society and knowledge economy. While education plays a critical role in this transformation, technology itself plays an important role in the improvement of educational processes and outcomes.

The knowledge of digital pedagogy will enable learners to be equipped with the four dimensions of digital pedagogy competence that are aligned with the international standards of digital competencies for educators. Each of these dimensions include multiple skills and knowledge components. They will facilitate learners to gather resources to support teaching and learning, navigate responsibly on the web, design experiences for impactful learning and empower learners with the new age pedagogy and assessments.

With the vision of enhancing professional skills of the teacher, CIET-NCERT in collaboration with UNESCO-MGIEP, is organizing a five-day online training on “**Digital Pedagogy**” from 25-29 July 2022 from 4.00 pm - 5.00 pm to leverage the understanding of teachers, students, teacher educators, administrators, and various stakeholders to integrate digital pedagogical practices in the teaching-learning process in order to enrich classroom experiences. The training is built upon four themes that represent the different dimensions of a teacher’s digital pedagogy competence. Together, they enable teachers to meaningfully integrate technology in their professional practice and create inclusive and impactful learning experiences. The online training will be live on NCERT official YouTube channel- <https://www.youtube.com/c/NCERTOFFICIAL> and also be simulcast through PMeVidya DTH TV Channels numbered #6-12 and Jio TV mobile app.
